

Environmental and Sustainability Policy

The Board recognizes that the activities of the organization impact on the environment, and UNICORP Engineering Consultants is committed to identifying and reducing those which are significant and developing improvements and opportunities where practicable. UNICORP Engineering Consultants are committed to responsibly choosing materials and components using sustainable sources where practicable.

This policy supports and sets a framework for our materials procurement. We will do this by:

- Complying with all applicable environmental and health and safety legislation.
- Encouraging the use of components or packaging with a low or zero Ozone Depletion Factor.
- Promoting the use of recycled products and materials or those containing a high recycled content.
- Promoting the use of durable materials and products with increased lifespan.
- Encouraging the use of materials with a low embodied energy/carbon impact.
- Encouraging the use of products that have low Volatile Organic Compounds (VOC) content.
- Encouraging the use of products using non-toxic materials & avoiding refrigerants with high Global Warming Potential.
- Sourcing products and materials locally wherever practicable.
- Promoting use of biodegradable cleaning products.
- Promoting use of paper from sustainable or recycled sources.
- Encouraging the reuse of materials to minimize waste.

The Managing Director is responsible for the implementation, development and review of this policy and the associated standards and procedures.

Engineer Samer Azzam

For and on behalf of UNICORP Engineering Consultants
